

Different types of therapists use different knowledge, skills and tools to help individuals of all ages recover from injury or illness, treat a physical or mental disorder, or work toward general wellness. See if you can match the nine therapists below with the work they do, then think about how you might match your interests with a career as a therapist, therapist assistant or aide!

- | | |
|-----------------------------------|--|
| (A) Art therapist | (1) treat cancer and other diseases in patients by administering radiation treatments |
| (B) Marriage and family therapist | (2) use art and psychology to help clients understand themselves and work toward specific goals |
| (C) Massage therapist | (3) care for patients who have trouble breathing |
| (D) Occupational therapist | (4) provide recreation-based treatment programs for people with disabilities, injuries, or illnesses |
| (E) Physical therapist | (5) help injured or ill people improve movement and manage pain |
| (F) Radiation therapist | (6) treat clients by using touch to manipulate the muscles and other soft tissues of the body |
| (G) Recreational therapist | (7) help people manage problems with their family and other relationships |
| (H) Respiratory therapist | (8) assess, diagnose, treat, and help to prevent communication and swallowing disorders |
| (I) Speech therapist | (9) treat patients through the therapeutic use of everyday activities |
